

Capabilities Assessment

Prepared for: Lockheed Martin · F-35 Sustainment

OPPORTUNITY

F-35 lot-19 sustainment: build-to-print spares

Matched to BTX 5-axis capacity and AS9100 line.

CAPABILITY FIT

91%

Core capabilities

5-axis CNC machining

Complex geometries, single-setup

Build-to-print

From customer models and specs

Precision turning

Swiss + multi-axis, ±0.0002 in

Assembly & kitting

Sub-assembly, integration, kitting

CMM metrology

Full first-article + in-process

Special processes

Coordinated NDT, finishing, coatings

Certifications & compliance

AS9100D

ITAR Registered

NIST SP 800-171

CMMC Level 2

DFARS 252.204

Nadcap (NDT)

Current production capacity

available capacity highlighted

Facility	5-axis centers	Shifts	Utilization	Available
Fort Worth, TX	8	2	93%	Q1 FY27
Wichita, KS	5	2	88%	Limited
Tulsa, OK	6	1	71%	Now

Materials & tolerances

- Titanium, Inconel & nickel alloys
- Aluminum, stainless & specialty steels
- Tolerances to ±0.0002 in
- Part envelope to 40 in, 5-axis

Track record

- 20+ yrs supplying tier-1 aerospace primes
- 99.2% on-time delivery (trailing 12 mo)
- <15 PPM quality escape rate
- 100% ITAR-compliant data handling
